PROFESSIONAL SUMMARY

Results-driven Automation Tester with over 4 years of hands-on experience in designing, developing, and executing automated test scripts using Selenium with Java, Cypress, and other modern testing tools. Demonstrated expertise in Salesforce, AWS, MuleSoft, and Vlocity integrations, with a strong foundation in Agile methodologies and CI/CD pipelines. Skilled in leading QA teams, streamlining testing processes, and ensuring the delivery of high-quality software under tight deadlines. Recognized for technical excellence, leadership, and innovative problem-solving.

WORK EXPERIENCE

Associate

October 2025 – Present

Cognizant Technology Solutions Pvt. Ltd.

- Architected a cross-platform **GitHub Copilot ecosystem** across Web, Extension, and CLI interfaces utilizing specialized configurations (**skills.md**, **agent.md**); built custom **MCP servers** to delegate complex workflows to cloud infrastructure, enforcing corporate compliance and reducing script rework cycles by **70%**.
- Built a production-grade, standalone **API Mocking Tool** from scratch using **Node.js** and **Express.js** with GitHub Copilot, enabling live monitoring of frontend requests to serve dynamic edge-case responses for critical UI release cycles.
- Designed an autonomous **AI Mesh Architecture** for LLMs featuring stateful context feedback loops, allowing real-time skill refinement per application feature while drastically reducing prompt iterations and token consumption.
- Spearheaded the architectural evolution of the legacy framework into a production-ready **Node.js & Express.js** mock data tool; integrated with the **Azure Developer Repository** to parse active XSD schemas, reducing manual update workloads by **80%**.

Programmer Analyst

Nov 2020 – October 2025

Cognizant Technology Solutions Pvt. Ltd.

- Designed and implemented a scalable automation framework using **BrowserStack**, **AWS**, **Azure Pipelines**, and **Selenium with Java & Maven**, ensuring 95% test coverage across browsers and devices.
- Led the migration from **Selenium (Java)** to **Cypress (JavaScript)** for a React-based digital application, improving execution speed by 60% and reducing test maintenance efforts by 40%.
- Led the **SAP to Salesforce migration project**, making sure everything worked smoothly and delivered almost error-free releases (99.8%) across AWS and Salesforce modules.
- Automated repetitive manual processes, resulting in a 25% increase in team efficiency and saving over 120 hours per release cycle.
- Conducted **API testing** using **Postman** and **REST Assured**, implementing CI/CD solutions through **Azure DevOps**, leading to a 40% improvement in deployment frequency.
- Supervised and mentored a team of 10+ testers, achieving a 15% defect reduction and consistently meeting sprint deadlines.
- Partnered with business and technical teams to design robust test cases and ensure 100% compliance with user stories and acceptance criteria.
- Developed a centralized Knowledge Management (KM) portal, increasing documentation accessibility and team onboarding efficiency by 50%.
- Delivered monthly MDRs and automation savings reports, contributing to 15% operational cost savings and identifying continuous improvement opportunities.
- Completed a POC on **WebdriverIO (WDIO)** for Salesforce automation and supported the migration of Selenium (Java) scripts to WDIO, integrating the framework with **GitHub Actions** for CI/CD.

TECHNICAL SKILLS

- **Automation Tools:** Selenium, Cypress, Playwright, REST Assured, Postman, BrowserStack, Cucumber, TestNG
- **AI Engineering & LLMs:** GitHub Copilot Extensibility, Model Context Protocol (MCP), Multi-Agent Mesh Systems, State Retention Loops, Prompt Engineering, Claude (Anthropic), Autonomous Subagents
- **Programming Languages & Frameworks:** Java, JavaScript, Node.js, Cypress, Serenity, WebdriverIO (WDIO)

- **CI/CD & Build Tools:** Maven, Azure DevOps Pipelines, GitHub Actions, Git
- **Defect & Test Management:** Azure DevOps, Trello, GitHub Project Board, ServiceNow, DataDog, JIRA
- **Testing Specialties:** UI Automation, API Automation, Functional Testing, Regression Testing, Integration Testing, Cross-Browser Testing, Cross-Device Testing
- **Cloud, Architectures & Methodologies:** Amazon Web Services (AWS), Microsoft Azure, Salesforce, MuleSoft, Vlocity, Micro Services, React, Angular, WayPoint, Agile, Scrum, Sprint Delivery

EDUCATION

Master of Science – Information Technology <i>Bharathiar University, Coimbatore</i>	2021 – 2025
Bachelor of Science – Information Technology <i>Kongunadu Arts and Science College, Coimbatore</i>	2017 – 2020

AWARDS & ACHIEVEMENTS

-
- Engineered an autonomous **context-crawling AI agent** that extracts live application DOM structures and page metadata into structured JSON, enabling LLMs to execute context-aware content generation across enterprise applications.
 - Developed and deployed a custom **Prompt Library VS Code extension** to standardize team-wide prompt engineering workflows by dynamically structuring inputs (acceptance criteria, rules, testing targets) for optimal LLM code output.
 - Architected an Anthropic **Model Context Protocol (MCP) server** leveraging **Microsoft Graph APIs**, allowing LLMs to securely access, parse, and analyze real-time data across corporate documents and spreadsheets.
 - Awarded **"Best Team Player of the Year – 2024"** – Recognized for exceptional performance, adaptability, and consistent contribution to successful project deliveries.
 - Awarded **"Best Performer of the Month – 2024"** – Awarded for effectively leading the end-to-end SAP to Salesforce migration project, ensuring seamless integration and quality output.
 - Honoured with **"Leadership Excellence Award – 2025"** – Honoured for fostering a collaborative, high-performance work environment and driving team success through mentorship and guidance.
 - Recognized for **"KM Portal Implementation Recognition – 2023"** – Acknowledged for independently setting up the Knowledge Management Portal for the Centrica QE team, significantly improving documentation and collaboration.

CERTIFICATIONS

-
- **Anthropic - Claude Certified Architect (Foundations)**
 - Advanced Track: Model Context Protocol: Advanced Topics, Introduction to Subagents, Introduction to Agent Skills
 - Cloud Implementations: Claude with Google Cloud's Vertex AI, Claude in Amazon Bedrock
 - Workflow Toolkits: Claude Code in Action, Building with Claude API, Introduction to Claude CoWork
 - DataDog Foundation
 - Introduction to Observability
